

Digital Office Automation

Shift productivity into a higher gear. **Set the new pace for business.**

Your organization demands lean operations and the agility to move with the speed of modern business. Teams stuck in tedious, time-consuming processes with scattered, incomplete information work hard, but can't deliver the effectiveness they know they're capable of.

Modern automated workflow and document management delivers team productivity to leap forward, driving new momentum that shifts strategy and resources from just getting stuff done to jumping into new growth.

- ✓ Kick-off digitization with one process and then expand as your business grows
- ✓ Focus employees on high-value, knowledge-driven work by eliminating manual tasks
- ✓ Secure information to meet privacy and compliance needs
- ✓ Provide your team the information they need—any time, any place and from any device—to drive better decisions at the point of business need

DocuWare Corporation

Higher productivity for the modern workforce

DocuWare is an intuitive digital workflow solution that securely captures, routes and archives documents across your processes. By removing the hassle of manual tasks and the headaches of cluttered shared drives, you open more time to focus on the deeper work that matters.

Available via cloud or on-premises, DocuWare is powerful enough to operate as a stand-alone workflow solution or as an integrated extension of your financial, HR or sales software.

Accounting: Accelerate AR and AP processes and simplify audits with transparent digital workflows

Human Resources: Streamline onboarding processes and securely store sensitive personnel documents

Customer Service: Enhance the customer experience with quick response and timely information to build lasting loyalty

Sales: Equip both field and in-house sales staff with mobile access to current price lists, proposals and contracts, and never miss a sale

And much more: Over 500,000 satisfied global users with custom workflows in manufacturing, government, nonprofit, education, healthcare, automotive, logistics, and more.

“

With a modern cloud solution ... we are now well-equipped for the future. We are convinced that the increasing digitalization of business processes will help us to significantly save both time and money.
